

professional services

We apply our experience and knowledge of the professional services industry to help you optimize operational efficiencies, forecast revenue growth, create compensation and benefit plans, assist with succession plans and make sound business decisions.

Beyond our core tax, audit and accounting service delivery, the HLB Tautges Redpath professional services team also works with clients to ensure entity structure, benefit plans and succession planning are designed to provide the most advantageous tax benefits to the shareholders.

We understand professional service companies and know it's important for them to provide value, build relationships, improve and apply synergy in offerings, and look for the right strategies to please current clients and attract new clients.
